

# KOBRA SSD HIGH SECURITY DISINTEGRATOR

**KOBRA**<sup>®</sup>  
Manufacturer: ELCOMAN Srl  
Brand: KOBRA  
Model: KOBRA SSD  
Article Code: 99.938

Throat width:	240 x 25 mm
Security level similar to:	O-7 T-7 E-7 F-7 DIN 66399
Shreds:	sand-like texture particles
Shreddable Materials:	Solid State Drives, Smartphones, iPads, USB Pen Drives, Circuit Boards, Credit Cards, DVDs/CDs
Waste capacity:	35 litres
Voltage:	380-415Volt/50Hz-60Hz 208Volt/60Hz
Power:	5,0 Kw
Dimensions (WxDxH):	103x82x121 cm
Weight:	500 Kg.
Rated Capacity:	approximatly 40 Kg/hour
EAN code	8 026064 999380

## MAIN FEATURES

The Kobra SSD is a solid state drives/devices shredder capable of destroying solid state drives, smartphones, memory sticks, iPads, USB memory devices, pen drives, tablets, circuit boards, credit cards and ID cards with embedded electronic chip and/or magnetic media, CDs/DVDs, flash memory IC chips, CPU chips with internal ROM and/or flash memory. Shredded material is reduced to sand-like texture particles. On this model, Kobra SSD reaches and exceeds NSA/EPL 9-12 requirements for the destruction of solid state devices.

The Kobra SSD is equipped with an integrated internal 38 litres gallon state-of-the-art HEPA air filtration system to insure a clean, safe and comfortable operating environment. The air filtration system continuously transports air from different areas inside the machine including the feed port and filters the air through a HEPA filter to capture and contain any harmful materials used in the manufacturing of ICs.

The SSD is supported by heavy duty lockable, double wheel casters for maximum mobility in the work area.

Easy access 240x25 mm feed port is designed with a safety brush covering the complete opening for safety and ease of feed operation. Lockable feed hopper cover prevents unauthorized access to the contents of the hopper once material is fed into the machine.

Features on the Kobra SSD include electronic safety lock out and shut down monitoring systems for bin access door, air filtration system access door and feed hopper, automatic reverse in case of accidental jam, two stage destruction operation with a large 180 mm diameter 16 blade grinders second stage for complete and reliable destruction, lighted indicator displays to keep the operator informed of machine's operating status, front mounted large lockable emergency stop switch for safety. Electronic monitoring system continuously adjusts the operation of both stages for reliable synchronous operation. Please note the Kobra SSD is designed specifically for solid state devices PCBs, credit cards, DVDs and CDs. Shredding of other materials will damage the unit. Output may vary depending on size and density of devices and supply voltage. The Kobra SSD is the perfect device for your solid state destruction applications backed by Kobra's over 30 years of experience in manufacturing of multi-media destruction equipment.

Easy emptying of waste container
