## ⚠ WARNING: IMPORTANT SAFETY INSTRUCTIONS — Read Before Using!

- Operation, maintenance, and service requirements are covered in the instruction manual. Read the entire instruction manual before operating shredders.
- Keep away from children and pets. Keep hands away from paper entry. Always set to off or unplug when not in use.
- Keep foreign objects – gloves, jewelry, clothing, hair, etc. – away from shredder openings. If object enters top opening, switch to Reverse (<) to back out object.
- DO NOT use aerosol products, petroleum based or aerosol lubricants on or near shredder. DO NOT USE “CANNED AIR” OR “AIR DUSTERS” ON SHREDDER. Vapors from propellants and petroleum based lubricants may combust causing serious injury.
- Avoid touching exposed cutting blades under shredder lid.
- Unplug shredder before cleaning or servicing.
- Do not use if damaged or defective. Do not disassemble shredder. Do not place near or over heat source or water.
- This shredder has a Disconnect Power Switch (D) that must be in the ON (I) position to operate shredder. In case of emergency, move switch to OFF (O) position. This action will stop shredder immediately.
- Shredder must be plugged into a properly grounded wall outlet or socket of the voltage and amperage designated on the label. The grounded outlet or socket must be installed near the equipment and easily accessible. Energy converters, transformers, or extension cords should not be used with this product.
- FIRE HAZARD – Do NOT shred greeting cards with sound chips or batteries.
- For indoor use only.

## SLEEP MODE

## SLEEP MODE OPERATION

Feature shuts down the shredder after 2 minutes of inactivity

### WHEN IN SLEEP MODE

To get out of sleep, open lid and load paper

or Insert paper

# PRODUCT MAINTENANCE

## OILING SHREDDER

All cross-cut and micro-cut shredders require oil for peak performance. If not oiled, a machine may experience diminished sheet capacity, intrusive noise when shredding, and could ultimately stop running. To avoid these problems, we recommend you oil your shredder each time you empty your waste bin.

### FOLLOW OILING PROCEDURE BELOW AND REPEAT TWICE

Open lid

\*Carefully apply oil across cutters (do not get oil in paper tray)

Close lid. Press start (▶)

**CAUTION** \*Only use a non-aerosol vegetable oil in long nozzle container such as Fellowes 35250 

## CLEANING AUTO-START INFRARED SENSORS

Paper detection sensors are designed for maintenance free operation. However, on rare occasions the sensors may become blocked by paper dust causing the motor to run even if there is no paper present.

(Note: the paper detection sensors are located in the center of the paper entry and bottom of paper tray).

### TO CLEAN THE SENSORS

Turn off and unplug shredder

Open lid

Locate Auto-start infrared sensors

Dip cotton swab in rubbing alcohol

Using cotton swab, wipe away any contamination from the paper sensors

## TROUBLESHOOTING

**Overheat Indicator:** When the Overheat Indicator is illuminated, the shredder has exceeded its maximum operating temperature and needs to cool down. This indicator will remain illuminated and the shredder will not operate for the duration of the recovery time.

**Remove Paper:** When illuminated, press reverse (<); open lid and remove paper.

**Bin Full:** When illuminated, the shredder waste bin is full and needs to be emptied. Use Fellowes waste bag 36054.

**Bin/Lid Open:** The shredder will not run if the bin or lid is open. When illuminated, close the bin or lid to resume shredding.
