This personal shredder ensures data security in private areas or home offices. Thanks to the separate CD cutting unit, CDs and DVDs, credit cards and store cards can be easily shredded. The shredded material is sorted into the separate CD waste container and you can dispose of it separately. An integrated light barrier starts the personal shredder automatically and switches it off again after the paper feed ends. The level of the waste container is always visible through the inspection window, making timely emptying possible. To empty the container you can simply remove the housing top.
