

intimus HDD Granulator

In the intimus® hard drive shredders, the disks are broken into tiny parts. The powerful machines are fast and reliable. The product range includes machines for various applications and offers solutions up to and including security level H-5 according to DIN 66399. The shredding of the hard drive is a safe and economical destruction process, with the possibility of a simple and visual inspection of the successful destruction.

- Unique Hybrid Technology combining the benefits of shredding and disintegration
- Security level determined by screen mesh diameter
- 6 different screen diameters available
- Shreds HDD up to 5.25"
- Maximum operator's safety
- Large feed hopper
- Solid sheet steel housing with removable waste bin
- Shredded material collected in standard waste bin

W/D/H 130 x 130 x 209/305 cm
